# ISDT

INSPIRE • INNOVATE • IMPLEMENT

## MESSAGE FROM THE EDITOR

It is with great pride that we present this edition of Newsletter of the ISDT. This First edition captures the spirit and purpose that drive our society forward. We hope this newsletter inspires collaboration, advances knowledge and reinforces our collective commitment to excellence in dental traumatology.

# KNOW ABOUT ISDT

## OBJECTIVES

- Promote knowledge and awareness about dental trauma among dental professionals, medical personnel, teachers, parents and the general public.
- Establish and promote scientific guidelines for the diagnosis, prevention and treatment of dental trauma.
- Conduct training programs, workshops and conferences for dentists and non-dental personnel involved in emergency management.
- Encourage and support research related to dental trauma.

## VISION

- To establish an organization of global standing that seeks to create awareness about traumatic dental injuries both amongst professionals and the general public.
- Promote innovation in education, develop newer methods of treatment through patient-centered, relevant research and implement the delivery of high-quality clinical care in prevention & management of traumatic dental injuries.

## MISSION

- To create a platform for general dentists and specialists in India for knowledge sharing, awareness, research and development of clinical protocols for excellence in prevention and management of traumatic dental injuries.

# EMIT PROGRAMME

**Emergency Management of Injured Teeth (EMIT)** is a flagship program to create awareness about tooth injuries, primary care and first aid among school teachers, sport persons, sport trainers, parents and paramedical staff across the country. This program was envisioned by the founder General Secretary of ISDT, Dr. M.S.Muthu and EMIT Co-ordinator, Dr Latha Nirmal.

## OBJECTIVES

1. To assess the knowledge of school teachers regarding the first aid measures to be taken during a traumatic dental injury to a child in the school premises.
2. To guide & train the school teachers in the step by step emergency management of any injury to tooth & associated structures in the school and proper referral to a dentist.

Till date, 3023 people have benefitted from the 49 EMIT programs, both through online and offline modes. Additionally, 401 professionals have already received training about its implementation.

# FELLOWSHIP IN DENTAL TRAUMATOLOGY

Indian Society of Dental Traumatology (ISDT) is proud to introduce its flagship Fellowship in Dental Traumatology (FISDT).

This structured, merit-based certification is designed to recognize clinical expertise, academic excellence and a commitment to advancing the science and art of dental trauma care in India.

## OBJECTIVES

- Enhance the value of ISDT membership by offering a prestigious and structured certification pathway.
- Provide accessible recognition to Indian dental practitioners with a keen interest and experience in dental traumatology.
- Establish peer-reviewed credibility, serving as a testament to the recipient's knowledge and skills in dental trauma management.
- Promote clinical excellence and continued learning in the field of dental trauma.
- Foster a community of leaders and mentors in dental traumatology.
